

EDITORIAL

Knowledge dissemination has no boundaries. In 21st century, knowledge sharing will be the most crucial means of knowledge dispersion throughout the globe. Dissemination of scientific information in the form of journals has served the end user a lot. Development in the information technology has been the latest dimension for the real time dissemination of knowledge.

It is a great challenge to bring a new research journal in to the world, especially when the Journal aims to publish high quality manuscripts. In addition, post graduate studies have been a major focus for most of us and many scholars understand it values. The research Journal “**AGRES – An International e-Journal**” aims to provide readers worldwide to cater the aspiring needs of scientists, researchers, academicians, policy makers, industrialists, students and progressive farmers with high quality scholarly research papers on a wide variety of issues related to Agriculture, Veterinary, Dairy, Food nutrition, Fisheries, Agriculture engineering, Biology, Taxonomy, Ecology, Wild life, Botany, Zoology, Biodiversity & Conservation, Biotechnology, Microbiology, Nanotechnology, Bioinformatics and Environment sciences.

Accordingly, we would like to request your participation by submitting quality manuscripts and encouraging your colleagues to submit quality manuscript on your research, discoveries, findings, views and opinions for publication. **ARK Publications** provides authors with high quality, helpful reviews that are shaped to assist authors to improving their manuscripts. This journal will remain relevant and thought provoking reflect the great diversity of vocation and opinion that exists in our readership and continue to make the field forward. At this special occasion of launching the first issue of “**AGRES – An International e-Journal**”, we look forward for your cooperation through contribution of articles. You will continue to have full and free access to global research and opinions on your computers.

We very much appreciate your support as we strive to make the most authoritative “**AGRES – An International e-Journal**” for biological sciences.
